Journal Name:	<b>Human Research in Rehabilitation</b> The International Journal for Education / Rehabilitation and Psychosocial Research
Manuscript Number:	Hrr_ID.....
Title of the Manuscript:	

**Declaration of Conflicting Interests:**

The author(s) declared no potential conflicts of interest with respect to the authorship and/or publication of this article. This article has no conflicts of interests and has never been published before nor is it in the process of being considered in another journal.

**Open Access:**

I agree that my article may all interested people to use for reading and citation without charge.

**Funding:**

The author received no financial support for the research and/or authorship of this article.

**Declaration of plagiarism**

I agree that the journal is not liable for any form of plagiarising, and the sole responsibility for such actions lies upon author of the articles.

**The use of generative AI**

I declare that the Authors did not use artificial intelligence and technologies supported by artificial intelligence to create the article.

*(What does plagiarism mean?* This text is downloaded from <https://www.elsevier.com/> as a recommendation for the Publishing Ethics Resource Kit (PERK) for editors. Useful link is (<https://www.elsevier.com/editors/perk/plagiarism-complaints>)

**Literal copying:** Literal copying is reproducing a work word for word, in whole or in part, without permission and acknowledgment of the original source. Literal copying is obvious plagiarism and is easy to detect by comparing the papers in question.

**Substantial copying:** Substantial copying is reproducing a substantial part of a work, without permission and acknowledgment of the original source. In determining what is “substantial,” both the quantity and the quality of the copied content are relevant. Quality refers to the relative value of the copied text in proportion to the work as a whole. Where the essence of a work has been reproduced, even if only a small part of the original work, plagiarism may have occurred. For example, a relatively short extract from a piece of music may be instantly recognizable and may constitute a substantial part. In addition to judging the quantity and quality of the copied content, you should consider the following question: Has the author benefited from the skill and judgment of the original author? The degree to which the answer to this question is “yes” will indicate whether substantial copying has taken place.

**Paraphrasing:** Copying may take place without reproducing the exact words used in the original work, i.e. without literal or substantial copying. This type of copying is known as paraphrasing, and it can be the most difficult type of plagiarism to detect. To determine whether unacceptable paraphrasing has occurred, you should apply a test similar to that for substantial copying: Look at the quantity and quality of what has been taken and also at whether the second author has benefited from the skill and judgment of the first author. If it seems clear, on a balance of probabilities, that the second author has taken without permission or acknowledgment all or a substantial part of the original work and used it to create a second work, albeit expressed in different words, then such use amounts to plagiarism).
